Supriadi
Backend Developer

I'm a software engineer with three years of experience, I've spent two years as a full-stack developer. For the past year, I have dedicated my skills and focus exclusively to backend development. Lately, I've been actively involved in developing applications using Node.js.

Experience

Mar 2020 - Aug 2020
PT.Virama Karya (Persero) | Semarang
Internship as Full-Stack Developer

Participated in the PMMB Internship Program at Forum Human Capital Resource Indonesia, serving as a Full-Stack Developer Intern.

Jan 2021 - Des 2022
DPU Bina Marga & Cipta Karya Provinsi Jawa Tengah | Semarang
Full-Stack Developer

Actively engaged in web development. Employed a skill set encompassing PHP, JavaScript, MySQL, MongoDB, HTML, and CSS.

Jan 2023 - Present
PT. Marsilian Akusara Lestari | Jakarta
Backend Developer

Actively engaged in server configuration, developing and maintaining robust backend solutions. Utilized the latest technologies including PHP, JavaScript, NodeJS, MySQL, MongoDB, RabbitMQ.

Recent Projects

Robocall

Contributed to a team in building a Robocall application with a microservices architecture, featuring MongoDB clustering for data resilience and RabbitMQ clustering for efficient communication between microservices. Played as a backend developer in the creation of APIs and overall app improvement.

BRI Survey

Contributed to a team in building a BRI (Bank Rakyat Indonesia) Survey app, a platform linking directly to nasabah for satisfaction surveys. Played as a fullstack developer in the creation of APIs and views.

Billing App

Contributed to the development of a billing application for Akulaku call history. Played as a fullstack developer in the creation of APIs and views.

Website Penyelamatan Danau Prioritas Nasional

Contributed to the development of the "Penyelamatan Danau Prioritas Nasional" project, collaborating among multiple ministries. Played as a fullstack developer in the creation of APIs and views.
